To whom it may concern,
I am writing you concerning the proposed development of a fish processing plant in Wheeler.
I am against this idea.
I cannot imagine how changing the face of one of the most charming towns along Oregon's highway 101 with so few, if any benefit at all to the town itself, could make anyone feel good about themselves.
Please consider this special place on earth, this estuary that provides this area so much life.
A Fish Processing plant will not help with water shortages, pollution, limited resources, traffic, the surrounding environment; the list goes on.
Please vote against this proposal.
Sincerely, Jennifer Layton
